Professional Summary

Final-year BS Computer Science student at FAST-NUCES Islamabad (graduating 2027) with research internship experience in medical machine learning. Built RAG systems, multi-agent AI workflows, deployed ML applications, and database-backed software. Seeking AI/ML, Python backend, or software engineering internships and part-time roles.

Education

BS Computer Science, FAST-NUCES, Islamabad **Expected 2027**

Experience

AI/ML Research Intern, AI Diagnostic Lab (AID Lab), FAST-NUCES **Summer 2026 | 6 weeks**

- Prepared and analyzed clinical data for ML-based prediction of chemotherapy-induced cardiotoxicity in breast cancer patients.
- Contributed to a three-stage prediction workflow covering baseline risk, interim monitoring, and end-of-treatment severity.

Technical Skills

Languages: Python, Java, Kotlin, C++, SQL, JavaScript, TypeScript
AI/ML: Scikit-learn, XGBoost, NLP, RAG, LangChain, LangGraph, CrewAI, ChromaDB, FAISS
Backend & Data: FastAPI, REST APIs, Pydantic, SQL Server, MySQL, Firebase
Tools: Git/GitHub, Docker, pytest, JUnit 5, Streamlit, React, Linux, Render

Selected Projects

AI Research Assistant – RAG 2026 | GitHub
Python, LangGraph, FastAPI, ChromaDB, Docker
Built document Q&A with BM25 + dense retrieval, reranking, source citations, and insufficient-evidence handling; added an evaluation harness and automated tests.

AI Career Assistant – Multi-Agent System 2026 | GitHub | Live Demo
CrewAI, Groq, FastAPI, Streamlit
Developed a five-agent CV/job matching workflow for skill-gap analysis, learning paths, and cover letters; implemented background processing and progress polling.

Reading Comprehension & Quiz Generation 2026 | GitHub
Python, Scikit-learn, XGBoost, NLP
Built supervised and semi-supervised ML pipelines on the RACE dataset; achieved 0.5284 macro F1 and evaluated label propagation with 10% labeled data.

Islamabad House Price Predictor 2025 | GitHub | Live Demo
Python, Selenium, Scikit-learn, FastAPI, Streamlit
Processed 1,500+ property listings, trained a Gradient Boosting regressor, and developed a web interface and prediction API.

Smart Coworking Space Management System 2026 | GitHub
Java, SQL Server, JDBC, Maven, JUnit 5
Contributed to a team-built management application for bookings, subscriptions, invoices, and role-based workflows using layered MVC/DAO architecture.

Certifications

Supervised Machine Learning (Coursera) | AI for Everyone (DeepLearning.AI) | GitHub Foundations (DataCamp)
