Muhammad Haris

Islamabad, Pakistan — 0306-1776945 — haris101gbb@gmail.com — github.com/muhammad-haris2 — linkedin.com/in/muhammad-haris-455166294

Professional Summary

Computer Science undergraduate with hands-on experience in Machine Learning, NLP, multi-agent AI systems, and full-stack development. Skilled in building end-to-end ML pipelines, REST APIs, and agentic AI applications using Python, FastAPI, LangChain, CrewAI, and Groq. Seeking an AI/ML part time job to contribute to real-world intelligent systems.

Education

Bachelor of Science in Computer Science Expected 2027

FAST National University of Computer and Emerging Sciences (FAST-NUCES), Islamabad, Pakistan

Technical Skills

Agentic AI: CrewAI, LangChain, Groq (Llama 3.3 70B), LLM Integration, Prompt Engineering, Multi-Agent Pipelines, Tavily Search API
Machine Learning: Scikit-learn, XGBoost, Gradient Boosting, Random Forest, KMeans, GMM, Label Propagation
NLP: TF-IDF, One-Hot Encoding, BoW, BLEU, ROUGE, METEOR, Cosine Similarity
Languages: Python, Java, Kotlin, C++, JavaScript
Backend & APIs: FastAPI, REST APIs, Pydantic, Firebase, JDBC, Maven
Databases: SQL Server, MySQL, FAISS (Vector DB)
Tools: Git/GitHub, Docker (basics), Render, Streamlit, Postman, Android Studio

Projects

AI Career Assistant — Multi-Agent System (CrewAI, Groq, FastAPI, Streamlit, Tavily) 2026
Live Demo — GitHub

- Built a 5-agent AI pipeline (CV Parser, JD Analyzer, Gap Analyzer, Learning Path Builder, Cover Letter Writer) to analyze CV-job fit and generate tailored roadmaps and cover letters.
- Designed FastAPI backend with background job processing for 3–5 minute AI pipelines; deployed on Render + Streamlit Cloud.

Reading Comprehension & Quiz Generation System (Python, Scikit-learn, XGBoost, NLTK) 2026
GitHub

- Built an ML pipeline on the RACE dataset (87k+ passages) for automated quiz generation and distractor generation, achieving Macro F1 of 0.5284.
- Implemented semi-supervised Label Propagation matching supervised performance using only 10% labeled data.

Islamabad House Price Predictor (Python, Scikit-learn, FastAPI, Selenium) 2025
Live Demo — GitHub

- Scraped 1,600+ real estate listings and trained a Gradient Boosting model achieving 93.2% R^2 across 100+ Islamabad locations.
- Built and deployed a full-stack FastAPI + Streamlit app on Render.

AI Research Assistant — RAG Application (LangChain, LangGraph, Groq, FastAPI, Chroma, Streamlit) 2026
GitHub

- Built an end-to-end **RAG application** for multi-document research using **LangChain, LangGraph, and Groq**.
- mplemented **hybrid retrieval, citation-aware responses, and FastAPI + Streamlit** interfaces.

Courses & Certifications

AI For Everyone (Coursera) • Supervised Machine Learning (Coursera) • 100 Days of Machine Learning (CampusX)

Core Strengths

Machine Learning & Agentic AI Development • Multi-Agent System Design & LLM Integration • Full-Stack Development & REST API Design • Data Structures & Algorithms • Clean Code & Agile Collaboration
